The Proven Performer in Laundry

SPEED QUEEN®

Stacked Washer-Extractor/Tumble Dryers

Cycle Data Comparison using 30lb Stacked Washer-Extractor/Tumble Dryers

	Speed Queen	Advantage		Competitor
Water Usage	21.0 gal	+	-	24.3 gal
Kwh per Cycle	0.160	+	-	0.190
Washer Cycle Time	24.30	+	-	26.56
BTU/lb Water	1902	+	-	1964
BTU/hr	73,000	+	-	80,000
Dryer Cycle Time	27.50	-	+	24.50
FMR% (Final Moisture Retention)	4.51%	+	-	8.28%

- While our dry time is longer, we use less energy and get more water out of the load. 5% moisture retention is the maximum for DOE. Our competitors 8.28% the clothes may still feel cold as there's still quite some water in the load.
- When looking at total wash/dry time, we are nominally longer by about 1 minute. However, we use less water and energy and get clothes dryer.
